

Another race has come and gone. The Kansas Speedway grossed over \$150 million in revenue today with Television, Beer, Soda, popcorn, programs, food and sales of merchandise.

wyandotte County supplied the Track, all of the police, fire, emergency personnel and government services and did not receive one penny. who paid for all of the services, why of course you did? The poor taxpayers of wyandotte County paid for all of the service to host the race and the track itself and even helped supply all of the electricity at a discount.

what I don't understand is why they don't have all the Races in wyandotte County, where else can the get pure profit off taxpayers backs?

Is it any wonder everyone with a half of a brain is moving out of the county? I left two years ago and moved to Prairie village. My taxes went down over 3 thousand a year and my insurance dropped over 1 thousand a year. I got sick and tired of supporting puppet politicians and political dictators who screwed their secretary and then promoted them.

How do you get to the top in wyandotte? screw the People.
